

## 19.4 Release Highlights

### Summer 2021 Enhancements

#### Progress Note Editor Updated to Use Rich Text Editing

Progress Notes and Materials now support different fonts, styling (bold/italic/etc) and colors.

- **Note:** To take advantage of automatic Rich Text, modify existing Progress Note and/or Materials text within Tables Clinical Progress Notes to reflect Rich Text styling by default.

#### Progress Note Audit Logs Added

Logs tab has been added to Patient Progress Notes for tracking of all additions, changes and deletions of any Progress Note.

#### Operator Table - Email Address Field Added

Email address field has been added for each provider/user in the Operator table. This field is not required when adding records but, if entered, will be checked for duplication within other Operator table records.

#### Diagnosis Field Added to Treatment Codes

A Diagnosis field has been added to the Treatment Table to support automatic population of a Diagnosis code on Insurance Claims when Treatment Codes are posted.

#### Browser Controls Updated to Microsoft Edge/Chromium

Microsoft has announced that the Internet Explorer browser will be retired in June 2022. XL Dent version 19.4 has replaced Internet Explorer browser dependency with the supported Microsoft Edge (Chromium-based) browser. This change affects both the Dosespot ePrescribing integration as well as the XL Dent Dashboard displayed within the XL Dent Main Menu.

#### Dosespot SingleSignOn

ePrescriptions using Dosespot has been updated to leverage the Chromium-based Microsoft Edge browser controls and a new method for SingleSignOn. These modifications ensure continued compatibility and enhanced security of your Dosespot integration.

#### Patient Search Inactive Status

Patient search has been enhanced to save filter selections (Status, Restrict Search, etc) individually per workstation. Example: If a user selects "Inactive" during a search, it will now remain selected until it is deselected.

#### Automatic Software Updates

XL Dent Version 19.3 customers now have the added convenience of scheduling any available XL Dent Software update to install overnight, with no downtime at the office!

#### Miscellaneous Maintenance Updates and Corrections

- Debit Codes have been added to Fee Schedules.
- Patient Photo capture enhanced for better stored image proportion when widescreen (HD) camera is used.
- User Name field (password tab) is now required to be unique in the Operator Table.
- XLCheckIn not locating Patients correctly when custom Appointment status is used has been corrected.
- Doc Archive missing preview for Patient Letters has been corrected.
- XL Dent eMessages now updates Appointments with the correct color for Confirmed-eMessage status.
- XLMsgs corrected a delay in launching/usage of the SMS message bubble.
- Timeblock Edit of Custom Recurrence Index Out of Bounds error has been corrected.
- Chart option for Configure Columns now correctly suppresses the Office column.
- Post Transactions and Treatment Chart corrections for erroneous occurrence of the Fee Change dialog, incorrect behavior of fee change when Code requires charted provider to be elevated, incorrect behavior when applying a new Value to Payments/Credits, and incorrect behavior of fee change when Treatment Plan items have user-defined fees and are scheduled/posted without going through Treatment Chart.

- Premature or Incorrect user counts for XLDent Licensing has been resolved.
